

Role-based Log Summary

Role: Admin

Generated: 2026-04-28T18:13:05.202787+00:00

Metrics

Metric	Value
Total Logs	503
Errors	3
Warnings	112
Info	388

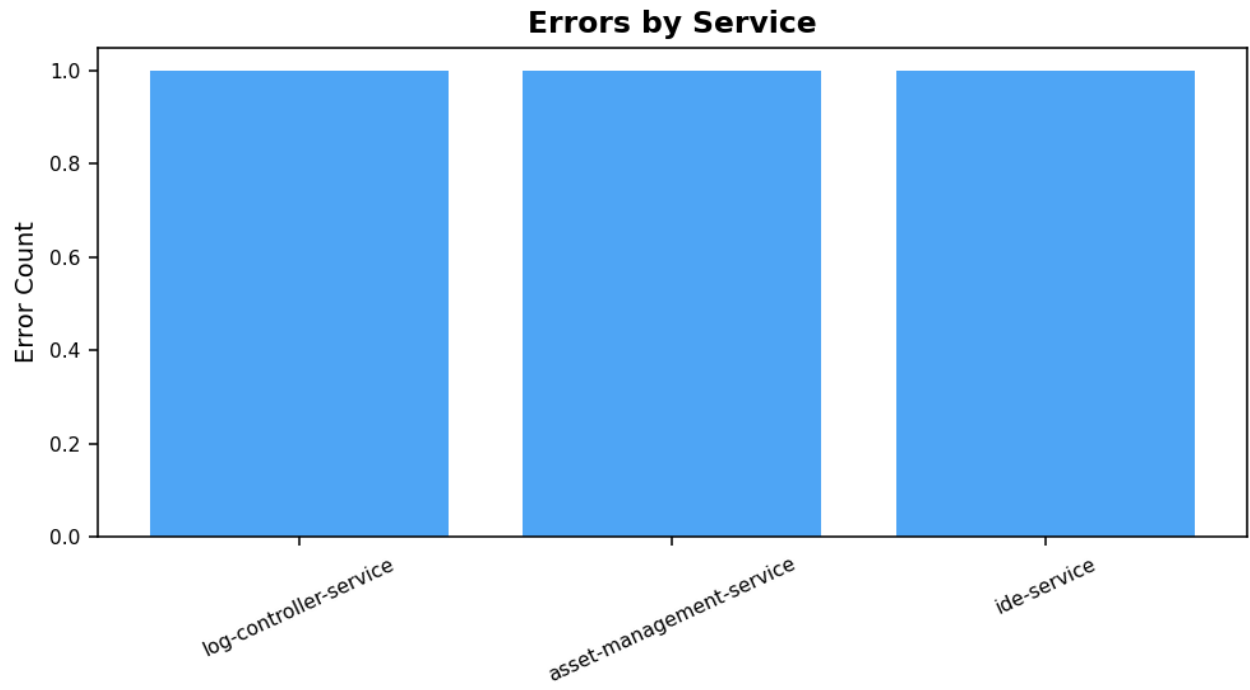

Insights

- Total scoped logs: 503.
- Top recurring error: Aggregated 4791 earlier error logs (1 occurrences).
- Most impacted service: log-controller-service.

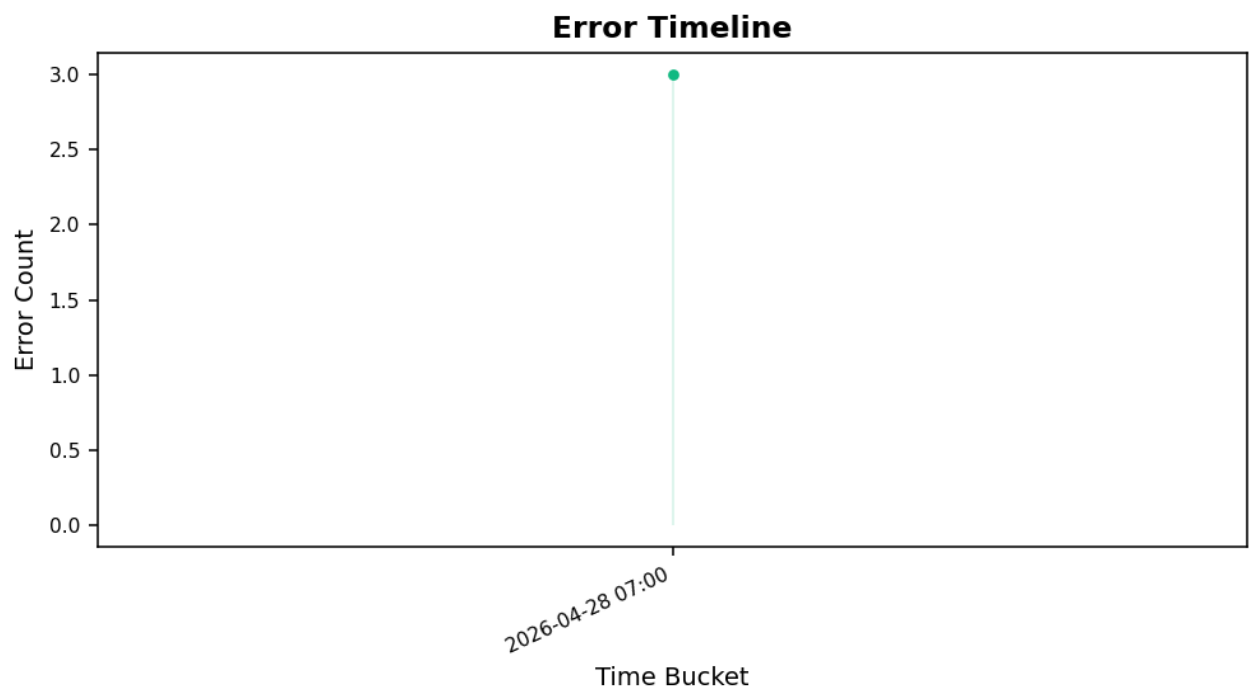

Service Breakdown

Service	Errors
log-controller-service	1
asset-management-service	1
ide-service	1

Errors by Service

Error Timeline

Recommendations

- Inspect recent log-controller-service deploys, dependencies, and retries if its error count keeps rising.
- Correlate the top error message with infrastructure changes and upstream service failures.
- Warnings outnumber errors, so inspect deprecation and saturation signals early.
