## Service Breakdown

| Service                  | Errors |
|--------------------------|--------|
| inventory-service        | 76     |
| log-controller-service   | 1      |
| asset-management-service | 1      |
| ide-service              | 1      |

## Errors by Service

Error Timeline

## Recommendations

- Inspect recent inventory-service deploys, dependencies, and retries if its error count keeps rising.
- Correlate the top error message with infrastructure changes and upstream service failures.
