## Insights

- Total scoped logs: 502.
- Top recurring error: RAW INPUT → service: [null], level: [null] (6 occurrences).
- Most impacted service: log-controller-service.

## Service Breakdown

| Service                | Errors |
|------------------------|--------|
| log-controller-service | 21     |
| inventory-service      | 11     |

## Errors by Service

Error Timeline

## Recommendations

- Inspect recent log-controller-service deploys, dependencies, and retries if its error count keeps rising.
- Correlate the top error message with infrastructure changes and upstream service failures.
